STREAMLINING GLOBAL OPERATIONS - INTEGRATING INTERNATIONAL VENDOR PORTAL WITH ERP

THE CUSTOMER

The company is a renowned skincare and wellness enterprise that has been at the forefront of developing advanced, science-based solutions for healthy skin. With a global presence, they serve customers worldwide, helping individuals achieve their skincare goals and enhance their overall well-being. Their dedication to innovation, science, and holistic health has earned them a trusted reputation as a leading authority in the skincare industry.

CHALLENGES

- Vendor Duplicates in the System
- W-9/W-8BEN file updation in the system
- Incomplete and Inaccurate Vendor Information
- Inconsistencies in Vendor Validation Information
- Balancing Available and New Vendors
- Challenges with Independent Teams and Systems
- Manual Claims Creation and Approval Errors
- Vendor History and Tracking Issues

KEY FEATURES

- Enhanced Vendor Data Completeness
- Improved Vendor Information Accuracy and Consistency
- Maintaining Integrity Across All ERP Modules
- Presence of Validated Vendors in the System
- Ensuring Uniqueness of Vendor Pricing
- Timely Updates of Vendor Information
- Tracking Supplier/Vendor Quality and Performance

OBJECTIVE

This solution aims to prevent unauthorized and non-validated vendor information and data from entering the ERP system. It enables organizations to efficiently onboard vendors, ensuring proper ownership and responsibility, while tracking the entire workflow status. The solution includes built-in data quality management features, such as ensuring data completeness, accuracy, consistency, integrity, and uniqueness.
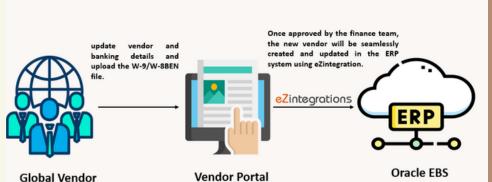

SOLUTION

- A vendor portal was developed enabling unique vendor creation into ERP avoiding duplication and non-validated information entering into system.
- Implemented seamless integration of vendor portal with ERP through eZintegrations ensuring smooth updating of W-9/W-8BEN file and vendor banking details.
- Streamlined the process of vendor verification, validation and tracking with workflow status.
- Incorporated integrated data quality management functionalities, encompassing measures to verify data completeness, accuracy, consistency, integrity, and uniqueness.

RESULT

- Enhanced Vendor Data Completeness
- Improved Vendor Information Accuracy and Consistency
- Maintaining Integrity Across All ERP Modules
- Presence of Validated Vendors in the System
- Ensuring Uniqueness of Vendor Pricing
- Timely Updates of Vendor Information
- Tracking Supplier/Vendor Quality and Performance

WHY BIZDATA

- Seamless vendor portal integration with ERP system, ensuring effortless data exchange, minimal manual intervention, and error reduction.
- The vendor portal creation and streamlined onboarding by ensuring unique and validated vendor creation, eliminating duplication before integrating with the ERP system.
- Optimized vendor verification, validation, and tracking workflows, enhancing visibility and control over vendor management
- Through robust data quality management, the platform guarantees vendor data completeness, accuracy, and consistency. It safeguards against duplications and unverified entries, upholding the integrity and dependability of vendor information within the ERP system.
- Comprehensive end-to-end integration solution.

update vendor and banking details and upload the W-9/W-8BEN file.

Once approved by the finance team, the new vendor will be seamlessly created and updated in the ERP system using eZintegration.

Global Vendor → Vendor Portal → eZintegrations → Oracle EBS (ERP)
